Profile

Full-Stack Web Developer with a Bachelor's degree in Physics, combining analytical rigor with creative problem-solving to build responsive, user-focused web applications. Skilled in both front-end and back-end development using modern frameworks and technologies, with a strong emphasis on performance optimization and seamless digital experiences. Passionate about translating complex ideas into elegant, scalable solutions and contributing to innovative tech projects from concept to deployment.

Professional Experience

Full-Stack Developer – Amplitude Ventures (05/2025 – 09/2025, Remote)
Worked on full-stack projects for startups, delivering scalable, responsive web platforms.

Full-Stack Developer – Warkalink (01/2025 – 09/2025, Remote)
Developed websites for restaurant, call-center, and delivery businesses with integrated chatbot systems.

Intern – Fana Broadcasting Corporate (FBC) (09/2024 – 01/2024, Addis Ababa)
Contributed to real-world software development and system maintenance.

Projects

SpeakerFlow – Event & Speaker Management Platform
Developed full-stack features to manage events and speakers efficiently.

LocalBite – Smart Online Visibility for Small Venues
Created online visibility solutions for local businesses using automation tools.

UniteSync – Music Rights Management Platform
Built core modules for artists and labels to track and manage royalties.
